

Travel Alerts

Information contained on this site is to be used for the IUH Intake screening tool. Travel notices are designed to inform travelers and clinicians about current health issues related to specific destinations. These issues may arise from disease outbreaks, special events or gatherings, natural disasters, or other conditions that may affect travelers' health. It is updated frequently to insure the most up-to-date information to assist in the assessment for highly infectious diseases.

Click on appropriate map for hyperlink to current outbreaks

| Notice Level | Traveler Action | Risk to Traveler |
|----------------|--|---|
| Watch | Reminder to follow usual precautions for this destination | Usual baseline risk or slightly above baseline risk for destination and limited impact to the traveler |
| Alert | Follow enhanced precautions for this destination | Increased risk in defined settings or associated with specific risk factors; certain high-risk populations may wish to delay travel to these destinations |
| Warning | Avoid all non-essential travel to this destination | High risk to travelers |
